DETAILED ACTION

1. This communication is in response to amendment filed 11/27/06.

Response to Amendment

2. Claims 1-3 have been cancelled. Claim 4 has been amended. Claims 4-6 remain pending.

Response to Arguments

3. In consideration of the applicant's arguments, rejections of claims under 35 USC 101 and 112 r have been withdrawn. However, in view of the amendment which resolves 35 USC 112 (first) deficiency (removing limitation "without prior interaction of either a buyer or a seller") a new ground of rejection under 35 USC 102 has been issued.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Art Unit: 3693

4. Claim 4-6 are rejected under 35 U.S.C. 102(a) as being anticipated by Shear et al. (US Pat. 6112181) (hereafter Shear).

As per claim 4 Shear teaches a method of facilitating a transaction using a computer connected to a network connected a network to match buyers and sellers, the method comprises a computer (..the inventions provide electronic computer based systems, methods ..for matching ..selecting digital information describing people and/or things, "Fields of the Inventions", col. 1). The method comprises:

a computer ("electronic matchmaker" described at col. 9 L 28+) which searches sites for want ads from buyers, said want ads referring to a wanted good or wanted service (computer sites of consumers seeking goods, see col. 10 L 16-38 in the example cited a Jeep sports utility model, the matchmaker searches a plurality of consumers since it matches "people or organizations with their best matches" .. "composite of preference profiles of one or more specific users, one or more user groups, and/or organizations--where the contribution of any given specific profile to the composite profile may be weighted according to the specific match circumstances such as the type and/or purpose of a given match activity", see col. 9 L 28+)

said computer (the "electronic matchmaker" described at col. 9 L 28+) which searches sites for sell ads from sellers, said sell ads referring to an advertised good or advertised service (computer sites of consumers seeking goods, see col. 10 L 16-38 in the example cited a Jeep sports utility model, the matchmaker searches a plurality sites of people or organizations who have indicated their Jeep sports utility model for sale via the "preference profile", see col. 9 L 28+)

having said computer match at least one want ad with at least one sell ad based on programmed rules (Electronic matchmaker of Shear is a centralized computer with extensive match making capabilities based on the profiles gathered from respective persons or organizations who are in need of good or service and those who provide the good and service (see for example, Shear at col. 12 L 1+ which shows exemplary want ad site represented by Jill in the form of Jill's information maintained in at her computer site. As described herein the matchmaker matches up with other sites (sites selling goods desired by Jill) as determined by the electronic matchmaker) the matching process of Shear is performed based on programmed rules (see col. 11 L 15 + See "The Present Inventions Can Make Use of Rights Management Information").

Notifying the associated buyer who posted said want ad that at least one sell ad has been matched to said want ad (see at least col. 10 L 16+ "In this non-limiting example, the electronic matchmaker is communicating to the consumer via the Internet and World Wide Web. ...)

Claims 5 and 6: notifying the associated seller for each matched ad that said notified buyer has requested a good or service similar to the advertised

Art Unit: 3693

good advertised in said matched sell ad; and inviting said notified seller to access said computer in order to make an offer to said notified buyer. (Refer to capabilities of Shear invention as described at col. 15 L 15+ - col. 16 in particular col. 16 L 14-19. the claimed features are inherent to the buyers and sellers perform cross matching goods for consideration, including negotiated bartering and other kind of matching).

Conclusion

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
